

CRYPTOLOG ARCADE

Memorable and data-dense document and study paradigm with a structural scheme.

Framework for publishing and improving primitives and protocols with a focus on both cooperation and implementation.

CRYPTO DARKPAPER

Indexed collection of related crypto color prints.

Increasing knowledge is integrated in a logical way.

A set or catalog of related darkpapers is a cryptologue or a cryptolog arcade.

CRYPTO COLOR PRINTS

Very short, singular focus publications color coded by purpose and relationship.

These papers are indexed on the darkpaper cover by relationship or order.

SIMPLEMENTATION

The purpose of technical knowledge is to enable and ease implementation.

A memorable and data-dense document scheme can support this against the tide of information overload.

The ideal goal is for each paper to be ruthlessly pared to one page, with an eye keen for data density.

GREEN PRINT

All data needed for a implementation.
Instructions required for implementors who need no other docs.
Ruthless exclusion of extraneous data.

RED PRINT

Flaws, errors, or criticisms of the target paper.

BLUE PRINT

Corrections, helps, mitigations, fixes, improvements for the target paper.

ORANGE PRINT

Test data, more info, extra specs, examples, code gists, errata.

YELLOW PRINT

References, citations, quotations, bibliography, links, contacts, credits, due diligence.

BRAIN PRINT

(GRAY PRINT)
Diagrams, mind maps, flow charts, graphs, and brainstorm.
